Sen. Kyrsten Sinema (I-AZ) - Palantir & Microsoft Financial Disclosure

Former Sen. Sinema (Intelligence and Homeland Security committees during key years) had family trust holdings and trades in Palantir, Microsoft, and Amazon. These companies directly power ICE's surveillance, data hosting, and targeting systems. Sinema's votes on border funding and surveillance bills coincided with periods of active trading in these names. STOCK Act and annual financial disclosures document the holdings.
